

The region's premier destination for STEM education

At Indiana Tech, we believe students deserve access to the best possible tools and resources to prepare them for the future. That's why we've invested heavily in creating a learning environment that mirrors the industries our graduates will one day lead. Our recent expansion and renovation of the Zollner Engineering Center reflects that commitment. This all-new, cutting-edge facility now serves as the vibrant home for a wide range of academic programs in:

- Engineering
- Computer Sciences
- Cybersecurity
- Life Sciences
- Technology
- Robotics and more

The Zollner Engineering Center is more than just a collection of classrooms. It is a hub of innovation and opportunity. Its advanced laboratories, collaborative spaces and state-of-the-art equipment allow students to explore, experiment and create in ways that prepare them for real-world challenges. Beyond benefiting Indiana Tech students, the Zollner Center also supports local industries and entrepreneurs through the Northeast Indiana Center for Engineering (NICE). As an initiative of Indiana Tech's Talwar College of Engineering and Computer Science, NICE offers companies and innovators access to resources for product development, prototyping, research and technical problem-solving.

This partnership model provides students and faculty alike with valuable opportunities to work

on meaningful, real-world projects that have a direct impact on the community. It is a hands-on approach that sets Indiana Tech apart from other institutions. While many colleges limit students' access to advanced labs until their second or third year, Indiana Tech students dive in from day one, building critical skills and confidence from the start.

Employers are looking for college graduates who possess hands-on experience and strong problem-solving skills. At Indiana Tech, our students are prepared to meet and exceed those expectations.
